New Hazardous Waste Generator Requirements Course

For more than thirty-five years industries have complied with detailed requirements governing the generation, treatment, storage and disposal of hazardous wastes. In June 2017, these regulations changed. The New Hazardous Waste Generator Requirements Course is designed to keep your facility in compliance with the changing regulations.

Who Should Attend?

This course is uniquely prepared and presented to educate environmental health and safety managers, consultants, plant managers and corporate staff on changes to new hazardous waste generator requirements under State and Federal Law.

Scope Of New Requirements

- > Hazardous Waste Determination Standard
- > Contingency Plan Revisions
- > Mixture Rule Clarification
- > New Generator Classifications
- > Episodic Events
- > Inter-corporation Transport of Hazardous Waste
- > Revised Satellite Accumulation Rules
- > Container Labeling Changes
- > Satellite Accumulation vs. New Central Accumulation Areas

Instructor Background

Attorneys with the Williams Mullen Environment and Natural Resources Practice Group have more than 160 years of environmental regulatory experience. The team represents businesses in hazardous waste compliance counseling, enforcement defense and permit negotiations. The attorneys are uniquely suited to offer comprehensive compliance training program for the new regulations.

The instructors are full-time practicing attorneys who can facilitate candid and pragmatic discussion on how the new regulations will affect industry and will be enforced.
